Red Numbers indicate levels of coliform bacteria considered high risk for humans in water-based recreation according to State and Federal Standards (235). Special care should be a priority when participating in activities where immersion or contact with the ears, nose, mouth and chances of ingesting water are a risk. Cuts, scrapes and open wounds could also be at a higher risk of infection.

Week 1 = May 26-30, Memorial Day Weekend - No Tests Due to Flooding

Week 2 = June 2-6 – No Tests Due To Flooding

Week 3 = June 8, 2008 – Begin Testing

Week 15 = Sept. 1, 2008 – End Testing - Labor Day Weekend
