

The Title V EIQ Webinar, Completing the EIQ was recorded with several sound issues.

There are periods where the sound drops out for up to two (2) minutes and periods where the sound cuts in and out intermittently.

We have tried to edit the recording to remove these periods of audio problems, but in doing so, we were not able to preserve the sync between the video and audio tracks. I apologize for the delay in getting this Webinar on the website for your use.

Where there are long periods of silence (within the first minute of the recording, the sound drops out for 2 minutes), advance the video until the sound picks up again. If there are areas where information is lost and not repeated, please contact the SPARS HelpDesk <DNR_AQB_SPARS_Helpdesk@iowa.gov> for assistance.

Again, please accept my apologies for the delay in making this Webinar available to you.
