

**Shimek State Forest
Lick Creek Unit
Compartment 4 & 5
Stands 24 & 28, 20 & 23**

The highlighted area will receive Shelter Wood harvesting in the fall of 2014.
There will be approximately 15-20 trees per acre harvested and a
number of small logs to be culled.
This will help to encourage natural regeneration because of the sunlight reaching the forest floor.
