

## Out of Planning Area Waste Flow Tracking

Iowa Administrative Code (IAC) 567-101.4 states that if a city or county facility refuses any particular solid waste type for management or disposal, the city or county facility must identify another waste management facility for that waste within the planning area. In the case of special waste, if no other waste management facility for that waste type exists within the planning area, the city or county must, in cooperation with the waste generator, establish or arrange for access to another waste management facility. Municipal solid waste sanitary disposal projects are required to maintain written approval from both the department and the planning area of origin in order to accept any Iowa-generated waste from outside the planning area. The following information is intended to satisfy the requirements of IAC 567-101.4.
