2405 SE Creekview Drive
Ankeny, IA 50021

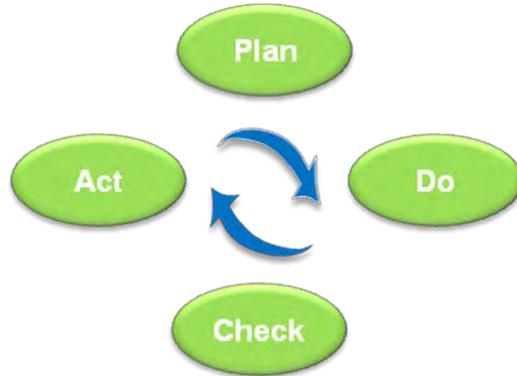

Time: 9:15 A.M. to 3:00 P.M.

Cost: \$60 (includes lunch)

Does your organization want to:

- reduce costs?
- reduce liability?
- improve market position?

We will show you how an EMS can benefit your organization!

In fall 2013, Pollution Prevention Services hosted a 2-day EMS Implementation/Certification Workshop for Iowa environmental professionals. The response was overwhelmingly positive, and numerous requests by attendees were made to continue this workshop series by providing additional, more in-depth training in various areas of EMS and ISO 14001.

EMS In Depth: Setting A's and I's and Rating Their Significance is the first in this workshop series and will focus attention on the identification of Aspects & Impacts within your facility, as well as different strategies to determine their significance. There will also be established times for open dialogue and networking amongst attendees, to encourage the exchange of different ideas and approaches. A future workshop in the *EMS In Depth* series will focus on Objectives and Targets & Environmental Programs, and is tentatively slated for fall 2014.

Leading the workshop will be Cory Sander of Sander Environmental Group, LLC, who has extensive experience developing, implementing, and maintaining ISO 14001 and other environmental management systems for numerous organizations including Honda, Ford, BNSF Railway, the City of Columbus, and Iowa DNR.
