

Material Information

Material: Flea and Tick Killers

Potential Hazards: May contain DDVP, dichlorvos, propoxur, pyrethrins, chlorpyrifos, silica gel. Harmful if swallowed, inhaled or absorbed through skin.

Recycle / Reuse: If you have unopened flea and tick products that are not outdated, check with your local animal shelter to see if they can use them. You may also call your local Regional Collection Center for its policy on placing flea and tick products in its swap shop.

Proper Disposal: Take to your local Regional Collection Center.

Green Alternatives: Limit pets to certain rooms, vacuum often, wash pet bedding, use flea comb, and wash pet with soapy water often.
