

Facility Name: Wildcat Den State Park-Fairport Station

PWSID#: 7048477

Date: 8/18/2015

PUBLIC NOTIFICATION

MONITORING VIOLATION OF THE WATER TESTING SCHEDULE

Our water system violated a drinking water standard(s) over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We, the Wildcat Den State Park-Fairport Station Public Water Supply are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During **April 1 - June 30, 2015** we did not monitor or test **annual sample** for Nitrate and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

What Happened? What is being done?

We missed the deadline for annual monitoring for Nitrate. We tested for Nitrate in the first week of August and the results came in below the detection limit.

For more information, please contact Park Ranger Gwen Prentice 563/263-4337.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
