

U.S. Department of Energy - Energy Efficiency and Renewable Energy Federal Energy Management Program

Energy-Efficiency Funds and Demand Response Programs

Select a state below to access more detailed information about that state's programs.

Legend

[Blue]	These states have public purpose and/or utility energy efficiency programs as well as demand response/load management programs.
[Green]	These states have demand response/load management programs.
[Orange]	These states have public purpose and/or utility energy efficiency programs.
[Diagonal Lines]	These states have distributed energy resource options available.
[Diagonal Lines]	These states have gas energy efficiency programs.
[White]	These states have no energy management programs.

Note

The energy management programs are categorized according to the following definitions:

- **Energy Efficiency Programs:** Can be either 1) *public purpose* programs which are administered either by utilities, state agencies or other third parties, and are paid for by utility ratepayers, typically through a non-bypassable System Benefits Charge which is instituted as part of restructuring legislation or rules or 2) *utility programs* administered by the local utility and paid for by utility ratepayers through their bundled rates.
- **Demand Response Programs/Load Management:** Programs which provide incentives to curtail demand and reduce load during peak periods in response to system reliability or market conditions.
