Burning Code

Unless prohibited by local ordinances or regulations, the open burning of trees and tree trimmings not originating on the premises may occur provided that the following conditions are met:

- Burn site must be operated by a local government entity;
- Burn site must be fenced and access to the site controlled;
- Burning is conducted on a regularly scheduled basis and is supervised at all times;
- Burning is conducted only when weather conditions are favorable with respect to surrounding properties;
- Burn site is limited to areas at least $\frac{1}{4}$ mile from any inhabitable building unless there is a written waiver from the building owner; and,
- Rubber tires shall not be used to ignite trees and tree trimmings.

Where the open burning of trees and tree trimmings causes air pollution, the DNR may take appropriate action to secure relocation of the burning operation. Open burning rules can be found at Iowa Administrative Code 567-23.2(455B).

Remember, you are legally responsible for any fire you start!

When in doubt, contact your local DNR Field Office for assistance.
