

Iowa Monitoring Locations and Design Values for Nitrogen Dioxide 2017-2019

A design value is a tool that can be used to understand pollution levels at a specific location. A design value may be set for any pollutant. The U.S. EPA's official definition is explained this way: "a design value is the mathematically determined pollutant concentration at a particular site that must be reduced to, or maintained at or below the National Ambient Air Quality Standard to assume attainment." The design value number tells us how a particular site or area compares with the National Ambient Air Quality Standards (NAAQS).

Iowa nitrogen dioxide (NO₂) monitor location and information is detailed on the following pages. The EPA design value for 1-hour NO₂ is equal to the average of the 98th percentile 1-hour value for the most recent three years. EPA revised the NO₂ NAAQS in April of 2012. A monitoring site must have a design value less than 100 parts per billion to be considered "in attainment" with the NO₂ NAAQS. All monitoring sites in Iowa are in attainment with the 1-hour NO₂ NAAQS. Additional information on the revised NO₂ standard is available here: <https://www.epa.gov/no2-pollution>

Iowa Nitrogen Dioxide Monitors (2019)

AQS Site ID	Site Name	Location	County	Design Value?
19-153-0030	Health Department	Des Moines	Polk	Yes
19-177-0006	Lake Sugema	Keosauqua	Van Buren	Yes

A site must be operational for at least three years to compute a design value and meet additional completeness requirements specified in [40 CFR 50 Appendix S](#).

Iowa NO₂ Monitoring Network 2019

Iowa NO₂ Design Values: 2017-2019

Concentrations listed in ppb. Values greater than 100 exceed the standard.

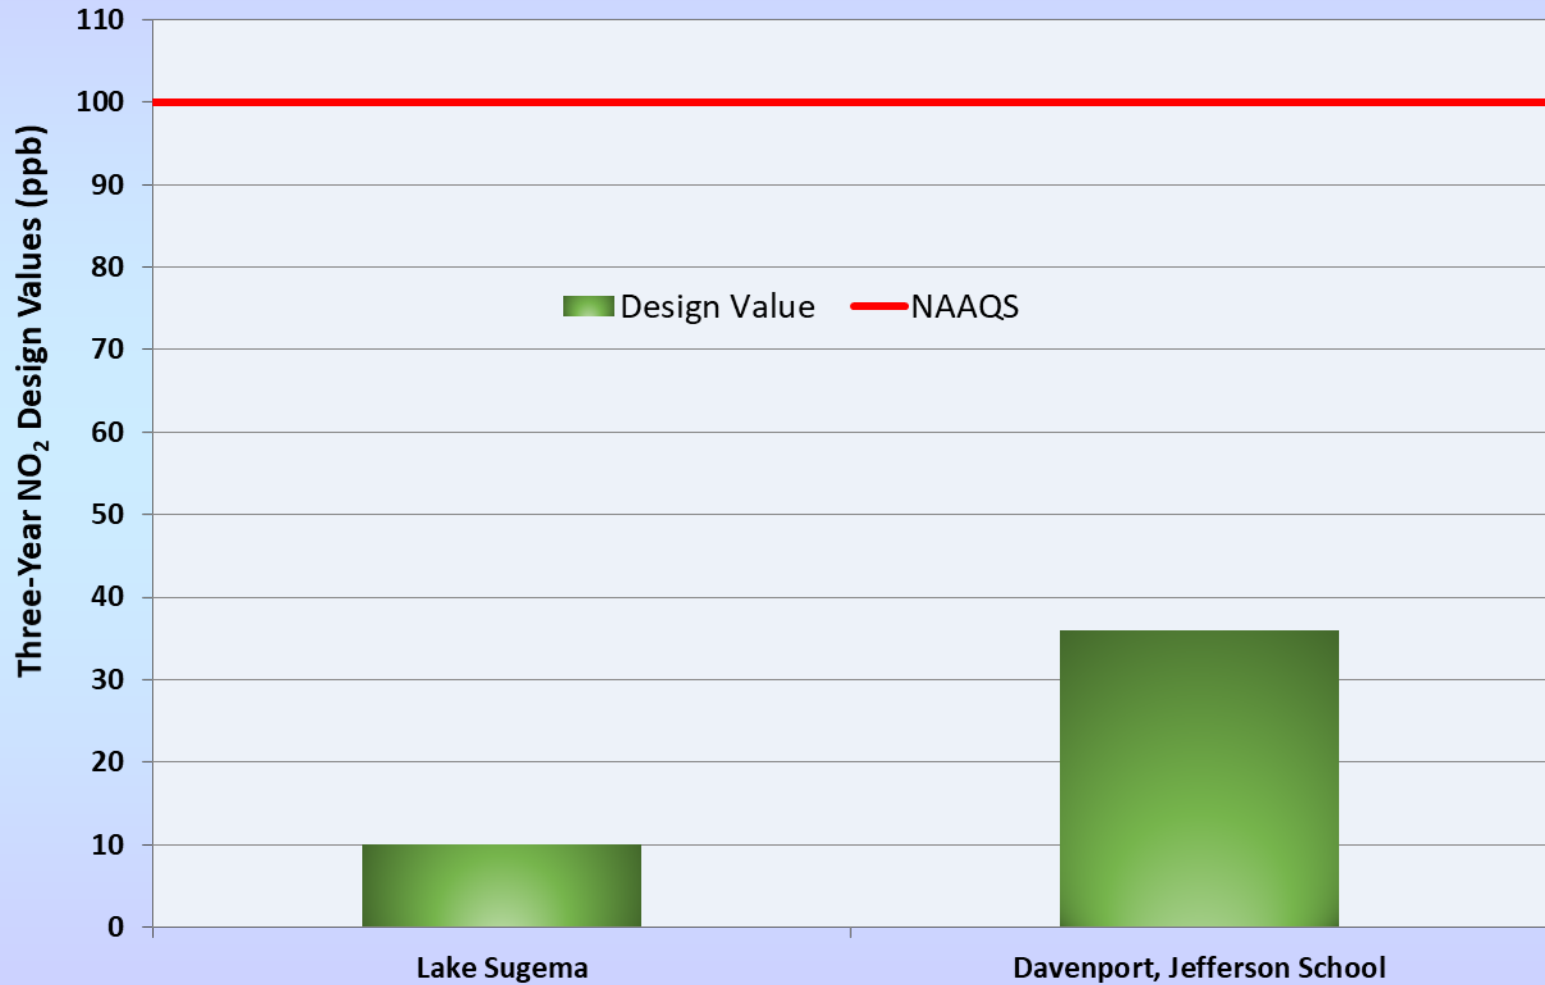

Iowa NO₂ Design Values: 2017-2019

County	City	EPA Site Id	Year	98th Percentile Hourly NO ₂ Concentration (ppb)	3-year Average of 98th Percentile (ppb)	Years Averaged
Polk	Des Moines	191530030	2017	38.2	36	2017-2019
			2018	34.0		
			2019	37.0		
Van Buren	Not in a City	191770006	2017	9.9	10	2017-2019
			2018	11.3		
			2019	8.6		
(Three Year Averages Greater Than 100 ppb Indicate Non-Attainment with the 1-hour NAAQS)						
Values are based on preliminary data. Data will be certified in May 2020.						

Three Year Averages Greater Than 100 ppb Indicate Non-Attainment with the 1-hour NAAQS.
 Values are based on preliminary data. Data will be certified in May 2019.
