

Emergency Response Contractors

www.iowadnr.com/spills/

The Iowa Department of Natural Resources does not register, certify or endorse contractors. Responsible parties are not required to hire contractors on this list. The Iowa DNR reserves the right to make the final determination as to whether a contractor will be listed based on our knowledge of their work practices. This list is provided as a courtesy to responsible parties to help expedite spill responses and cleanups. These contractors have indicated that they are in compliance with OSHA regulations for emergency response personnel (OSHA 1910.120).

It is essential that contractors communicate directly with the Iowa DNR once they have been hired by a responsible party. This will ensure that the contractor is aware of the onsite conditions, brings the proper equipment to the spill site, and understands the Department's expectations for cleanup and coordinates with other state and local officials. We also advise responsible parties to determine if the contractor hired is actually performing the on-site work or is subcontracting the work to another contractor.

Whenever possible, we recommend that companies pre-plan for emergencies and contact potential contractors before an incident occurs. Keep in mind that a contractor may not always be available to respond to an incident due to previous commitments. Iowa is a predominantly rural state and it may take several or more hours for a contractor to respond to a site.

NOTES:

- **Public hazardous materials teams respond only at the request of local officials, do not contract with private companies and do not respond outside of their regional contracts. Not all counties in Iowa have a contract with a public hazardous materials team.**
- **The Iowa DNR does not have a hazardous materials team and will not hire a contractor for you.**
- **Unless noted, the contractors listed do not provide services for nuclear/radiation incidents, biohazards, explosives or weapons of mass destruction.**

RESPONSE LEVELS:

- **Level A** – Requiring the greatest level of skin, respiratory, and eye protection.
- **Level B** – Requiring the highest respiratory protection but a lesser level of skin protection.
- **Level C** – Requiring lesser levels of respiratory and skin protection.
- **Level D** – Requiring little or no respiratory and skin protection.

Any company determined to have misrepresented its qualifications, on-site authority, response levels or expertise will be removed from this list for a minimum of 3 years.
