

Suggested planting plan for Pheasant Packet

* Ninebark and Gray Dogwood (4' spacing between plants).

♣ Wild Plum (4' spacing between plants).

🌲 Red Cedar (16' staggered spacing between plants).

Total area is 0.37 acres.

DNR Forestry Pheasant Packet

Suggested layout for pheasant woody habitat area. Locate adjacent to other grassland or wetland cover and within 1/4 mile of food. Pheasant packet will not protect pheasants during severe winter, see Iowa DNR Shelterbelt Cost-Share brochure for severe winter cover design. Contact your local DNR biologist or forester for help.
