Tank Identification
Person Completing Form
Check your tank size, test duration, and weekly/monthly standards in the table below:
Facility Name

| Tank Size | Minimum Duration Of Test | Weekly Standard (1 test) | Monthly Standard (4-test average) |
| :---: | :---: | :---: | :---: |
| $\square$ up to 550 gallons | $\square 36$ hours | $\square 10$ gallons | $\square 5$ gallons |
| $\square$ 551-1,000 gallons (when tank diameter is 64") | $\square 44$ hours | $\square 9$ gallons | $\square 4$ gallons |
| $\begin{aligned} & \square \text { 551-1,000 gallons } \\ & \text { (when tank diameter is } 48 \text { ") } \end{aligned}$ | $\square 58$ hours | $\square 12$ gallons | $\square 6$ gallons |
| 551-1,000 gallons (also requires periodic tank tightness testing) | $\square 36$ hours | $\square 13$ gallons | $\square 7$ gallons |
| 1,001-2,000 gallons (also requires periodic tank tightness testing) | $\square 36$ hours | $\square 26$ gallons | $\square 13$ gallons |

- Compare your weekly readings and the monthly average of the 4 weekly readings with the standards shown in the table on the left.
- If the calculated change exceeds the weekly standard, the UST may be leaking. Also, the monthly average of the 4 weekly test results must be compared to the monthly standard in the same way.
- If either the weekly or monthly standards have been exceeded, the UST may be leaking. As soon as possible, call your implementing agency to report the suspected leak and get further instructions.
