Free Product Recovery Reporting Using the Online Application

Effective Friday, September 2, 2022, the Department of Natural Resources (DNR) is removing the ability to enter new free product recovery data using the free product reporting tab in the online RBCA application. The data already entered there will be read only. Going forward Free Product Recovery Reports must be submitted electronically using DNR forms 542-1424 and 542-1425 for all new LUST sites with start dates after January 1, 2022 (starting sequentially with LUST 9LTT20).

The free product reporting forms are available online [here](#). Electronic copies of the completed forms should be submitted to ust.rbcasoftwaremtbe@dnr.iowa.gov.

For LUST sites with start dates before January 1, 2022, completed DNR forms 542-1424 and 542-1425 may be submitted electronically or hard copies of the forms mailed to the DNR.

For more information you can contact the DNR LUST site project manager.
