56-SDP-07-80: Great River Regional Waste Authority Sanitary Landfill	Wade	Hamm	Yes	Yes	Yes	Yes	N/A
57-SDP-01-72: Cedar Rapids/Linn Co. Solid Waste Agency #2 Sanitary Landfill	Laura	Routh	We accept dead animals for disposal, under the following conditions: We require that generators of large animals (cows, horses) contact us at least 24 hours in advance of delivery, so that we can prepare a disposal area and get the carcass buried immediately. Typically, we schedule these for delivery first thing in the AM. We require that ALL deliveries of dead animals/carcasses be declared to the scale. We reserve the right to reject any load that is not accurately declared. We require that generators of dead animals deliver them to the landfill. We do not allow dead animals to be placed in convenience containers. As with any unusual waste stream, advanced notification is greatly appreciated.	We will consider disposal from mass animal mortality events on a case by case basis, at the discretion of Agency management. We reserve the right to apply delivery conditions and protocols.	We identify diseased carcasses as a special waste, and thus require a special waste profile be completed, and written pre-approval be requested. We impose specific delivery requirements for diseased carcasses. Protocols for pathogen stabilization (i.e. application of lime; macroencapsulation, etc.) may also be required.	Yes, see 2 and 3	In the event that we are not able to safely manage a particular dead animal waste stream, we would refer the generator to neighboring landfills, or back to DNR.
