

Cathode Ray Tubes

Did you know that Cathode Ray Tubes (CRTs) are a Household Hazardous Material?

- Iowa law prohibits businesses from disposing of CRTs in a landfill
- Each CRT contains 5 to 7 pounds of lead
- Lead is harmful to the environment and your health

What can you do?

- Recycle unwanted CRTs through local programs
 - Purchase plasma, LED or LCD televisions and computer monitors
-

CRT RECYCLING LOCATION:

Contact your local Solid Waste Agency or Regional Collection Center to learn more about Household Hazardous Materials or visit
