Land Application of Various Materials

The purpose of this document is to assist in locating the appropriate chapter of the Iowa Administrative Code (IAC) for land application of various materials.

**Iowa Administrative Code chapters:**
- Compost [567 IAC 105](567%20IAC%20105)
- Fertilizer and soil conditioners [21 IAC 43](21%20IAC%2043) and [21 IAC 44](21%20IAC%2044)
- Manure and animal bedding [567 IAC 65](567%20IAC%2065)
- Paunch manure [567 IAC 121](567%20IAC%20121)
- Petroleum contaminated soil [567 IAC 120](567%20IAC%20120)
- Septage [567 IAC 68](567%20IAC%2068)
- Sewage sludge [567 IAC 67](567%20IAC%2067)
- Sludge from commercial or industrial wastewater treatment, water supply treatment, or air pollution control facility [567 IAC 121](567%20IAC%20121)
- Solid waste [567 IAC 121](567%20IAC%20121)
- Wastewater [567 IAC 64](567%20IAC%2064)

**Industrial waste**
The flow chart below is to assist in differentiating between wastewater, fertilizer or soil conditioner, and solid waste or industrial sludge. For a more complete description of each of these land application programs, please see the fact sheet entitled “Land Application of Industrial Waste”.

* A treatment plant is a facility that has received a construction permit from the wastewater section or a pretreatment facility that is exempt from permitting.
