Public Notice Antidegradation Analysis

Notice is hereby given that a draft antidegradation analysis (AA), associated with an application for lowa Department of Natural Resources (DNR) Section 401 Water Quality Certification, has been completed for the following projects.

PROJECT DESCRIPTION: Eagle Point Lift Station Bank Stabilization in Section 25, Township 99N, Range 37W, and/or 43.36656/-95.16328, Dickinson County. Existing channel bank near a IGLSD lift station has eroded. The purpose of the project is to establish a protected channel bank via sheet piling and revetment material to ensure the lift station is not further impacted by erosion.

The AA and supporting information are available at https://www.iowadnr.gov/Environmental-Protection/Water-Quality/Section-401-Water-Quality-Certification.

Anyone wishing to comment on the AA must do so in writing by 4:30 PM on May 9, 2024. All relevant comments will be considered by the DNR. Written comments should be submitted by email to Section401WQC@dnr.iowa.gov or by mail to the DNR, Attn: Section 401 Water Quality Certification, 502 E Ninth St., Des Moines, IA 50319.

Memorandum

DATE: April 8, 2024 FROM: Brandon Harland

RE: Rationale for Section 401 Water Quality Certification for Corps Number

2023-1728; Iowa Great Lakes Sanitary District

Project Description: Eagle Point Lift Station Bank Stabilization. Existing channel bank near a IGLSD lift station has eroded. The purpose of the project is to establish a protected channel bank via sheet piling and revetment material to ensure the lift station is not further impacted by erosion.

[See the Corps/DNR public notice for more detail.]

Project Location: Section 25, Township 99N, Range 37W, and/or 43.36656/-95.16328, Dickinson County

Receiving Water Bodies

West Lake Okoboji is an A1, BLW, C, HH designated use waterbody. The designated uses have been adopted in Iowa's state rule, described in the rule-referenced document of Surface Water Classification effective on July 24, 2019. West Lake Okoboji is an Outstanding Iowa Water, per the State adopted Iowa Antidegradation Implementation Procedure (2010 and 2016).

Antidegradation

Pollutants of Concern

This project proposes to establish a protected channel bank via sheet piling and revetment material to ensure the lift station is not further impacted by erosion. Chemicals will not be used. Thus, the pollutants present in the discharge from such construction are substances present in runoff, or are the result of a spill. The DNR has identified the following pollutant of concern in discharges from this project and the potential impacts on water quality:

Increased Turbidity/Total Suspended Solids

The turbidity of water is related to the amount of suspended solids contained in the water. Suspended solids decrease the clarity of water, reduce light penetration, and can impair the photosynthetic activity of aquatic plants. Suspended solids can be aesthetically displeasing and can reduce the recreational value of a water body. If suspended solids screen out light and impair growth of aquatic plants, dissolved oxygen levels can decrease. Suspended solids can be harmful to fish and other aquatic life by causing abrasive injuries and clogging gills and respiratory passages.

Increases in turbidity/total suspended solids from projects authorized by this project will generally be local and temporary. To address turbidity/total suspended solids, the permittee will control runoff to water bodies using a variety of best management practices (BMPs).

Best Management Practices in Permit and Certification Conditions Permit-Based

The Corps has BMP-based conditions in the Section 404 permit.

Construction activity that disturb one or more acres require a storm water NPDES permit from the DNR. For projects that require storm water NPDES permits, Storm Water Pollution Prevention Plans (SWPPPs) are developed, which typically include BMP-based conditions.

Certification-Based

The DNR is adding BMP-based conditions to the certification. The combined listed BMPs, when adhered to by the permittee, protect lowa's water quality by controlling erosion and sediment runoff to prevent pollution from reaching the nearby water bodies. Antidegradation requirements will be considered to be met if all appropriate and reasonable BMPs required by permit and certification are applied and maintained. See, 567 IAC 61.2(2); Iowa Antidegradation Implementation Procedure § 6.3.

Temporary and Limited Degradation

The State adopted Iowa Antidegradation Implementation Procedure (2010 and 2016) states that "A regulated activity shall not be considered to result in degradation, if the activity will result in only temporary and limited degradation of water quality as defined in the glossary and as further described in Sections 1.2 and 2.4." The effects can be regarded as temporary and limited following a review of all of the following factors, if applicable:

a) Length of time during which water quality will be lowered

The length of time where there might be a lowering of water quality is relatively short for the proposed activity.

b) Percent change in ambient conditions

The only significant change that is reasonably expected to occur would be for the presence of sediment in the stream if there is a heavy rainstorm or if the BMPs fail.

c) Pollutants affected

Turbidity, total suspended solids.

- d) Likelihood for long-term water quality benefits to the water body
 - This activity provides water quality benefits by stabilizing a bank/shore.
- e) Degree to which achieving the applicable Water Quality Standards during the proposed activity will be at risk

The use of BMPs installed prior to construction, maintained during construction, and until the site has returned to pre-construction conditions should greatly increase the degree to which a project achieves the applicable water quality standards.

f) Potential for any residual long-term effects on existing uses

The BMP-based conditions included in the Section 404 permit and certification include activities such as appropriate riprap/native field stone or sheet piling. This project should not contribute to any ongoing impacts to water quality.

For the above discussed reasons, the DNR makes the following finding:

This review concludes that water quality degradation due to this activity is temporary and limited.

Social and Economic Importance

This project is socially important for maintaining water quality for a recreational water body used for boating and swimming.

This project is economically important by creating jobs in the planning and construction of this project and likely using materials from local sources, as well as for the value of the property.

For the above discussed reasons, the DNR makes the following finding:

This review concludes that water quality degradation due to this activity is necessary to accommodate important economic and social development.

Iowa Department of Natural Resources

Section 401 Water Quality Pre-Filing Meeting and Certification Request Form

1. Type of Request:
2a. Property Owner/Project Proponent (aka Applicant) Name: Steve Anderson
Company Name (if applicable): Iowa Great Lakes Sanitary District
Mailing Address: 303 28 th Street, Milford, IA 51351
Email Address: iglsd@iglsd.com
Phone numbers (with area code): Home: Cell: Business: 712-338-2626
2b. Authorized Agent's Name (if applicable): Jessica Fisher
Company Name: Bolton & Menk
Mailing Address: 1519 Baltimore Drive, Ames, IA 50010
Email Address: jessica.fisher@bolton-menk.com
Phone numbers (with area code): Business: Cell: _515-567-0919
3. Identify the Proposed Project: Eagle Point Lift Station Bank Stabilization
4. Federal Permit / License Requiring Section 401 Water Quality Certificate and its Project Number* Permit/License Number: CEMVR-RD-2023-1728 Federal Agency: Corps of Engineers FERC Other:
*A copy of the federal permit or license application is required to be submitted with a certification request.
5. Project Location: Section: 25 Township: 99N Range: 37W
County: Dickinson Latitude: 43.366560 Longitude: -95.163280
Receiving Water(s): West Okoboji Lake
Discharge: rip rap, turbidity barrier
FOR PRE-FILING MEETING REQUEST ONLY 6. Pre-filing Meeting Request Verification: I certify that I have read and understand the following statements per the Clean Water Act Section 401 Certification Rule: • Submission of this form completes the requirement of the pre-filing meeting request. • I cannot submit my certification request until at least 30 calendar days after submitting this pre-filing meeting request. This request must be signed by the Property Owner/Applicant and the Authorized Agent, if applicable.
Property Owner/Applicant's Name (printed): Steve Anderson
Property Owner/Applicant's Signature: Min Date: 5 Jan 24
If applicable: Authorized Agent's Name (printed): Jessica Fisher
Authorized Agent's Signature:

U.S. Army Corps of Engineers (USACE)

APPLICATION FOR DEPARTMENT OF THE ARMY PERMIT

33 CFR 325. The proponent agency is CECW-CO-R.

Form Approved - OMB No. 0710-0003 Expires: 01-08-2018

The public reporting burden for this collection of information, OMB Control Number 0710-0003, is estimated to average 11 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or burden reduction suggestions to the Department of Defense, Washington Headquarters Services, at whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. PLEASE DO NOT RETURN YOUR APPLICATION TO THE ABOVE EMAIL.

PRIVACY ACT STATEMENT

Authorities: Rivers and Harbors Act, Section 10, 33 USC 403; Clean Water Act, Section 404, 33 USC 1344; Marine Protection, Research, and Sanctuaries Act, Section 103, 33 USC 1413; Regulatory Programs of the Corps of Engineers; Final Rule 33 CFR 320-332. Principal Purpose: Information provided on this form will be used in evaluating the application for a permit. Routine Uses: This information may be shared with the Department of Justice and other federal, state, and local government agencies, and the public and may be made available as part of a public notice as required by Federal law. Submission of requested information is voluntary, however, if information is not provided the permit application cannot be evaluated nor can a permit be issued. One set of original drawings or good reproducible copies which show the location and character of the proposed activity must be attached to this application (see sample drawings and/or instructions) and be submitted to the District Engineer having jurisdiction over the location of the proposed activity. An application that is not completed in full will be returned. System of Record Notice (SORN). The information received is entered into our permit tracking database and a SORN has been completed (SORN #A1145b) and may be accessed at the following website: http://dpcld.defense.gov/Privacy/SORNsIndex/DOD-wide-SORN-Article-View/Article/570115/a1145b-ce.aspx

US Army Corps of Engineers Consent Required

Certain minor activities are eligible for authorization by general permits, which include Nationwide (NWP) and Regional General (RGP) permits. By selecting "No" below, you are acknowledging that you have verified that your project meets the general, special, and 401 Water Quality Certification conditions of a NWP relative to your request and that no notification criteria has been met. No further coordination with the Corps of Engineers Regulatory Division is necessary if this "No" box is selected.

Additional Information

Do you have any additional information that we should know about regarding your application?

IOWA DEPARTMENT OF NATURAL RESOURCES

Fax: 515-725-8202

DIRECTOR KAYLA LYON

April 8, 2024 (DRAFT)

Iowa Great Lakes Sanitary District Steve Anderson 303 28th Street Milford, IA 51351

Dear Steve Anderson:

After reviewing your request for State 401 Water Quality Certification (Certification), the Iowa Department of Natural Resources (DNR) has issued the enclosed Certification. Please read the attached conditions carefully before beginning work on the project.

A copy of this Certification has been forwarded to the office of the U.S. Army Corps of Engineers as indicated below.

Please note:

- 1. Prior to construction, the permittee is responsible for securing such other permits or approvals as may be required by the DNR, federal, state, or local governmental agencies for the project activities described.
- 2. The permittee is responsible for ensuring that whoever performs, supervises, or oversees any portion of the physical work associated with the construction of this project complies with all the terms and conditions of this Certification as well as the associated Section 404 Permit.

If you have any questions about the certification or attached conditions contained therein, my contact information is provided in the certification.

Sincerely,

Brandon Harland Natural Resource Biologist

Phone: 515-725-8200

IOWA DEPARTMENT OF NATURAL RESOURCES SECTION 401 WATER QUALITY CERTIFICATION

Certification issued to:

Iowa Great Lakes Sanitary District Steve Anderson 303 28th Street Milford, IA 51351

Project certified: U.S. Army Corps of Engineers, No. 2023-1728

Project Description: Eagle Point Lift Station Bank Stabilization. Existing channel bank near a IGLSD lift station has eroded. The purpose of the project is to establish a protected channel bank via sheet piling and revetment material to ensure the lift station is not further impacted by erosion.

Project Location: Section 25, Township 99N, Range 37W, and/or 43.36656/-95.16328, Dickinson County

The Iowa Department of Natural Resources (DNR) has issued this State 401 Water Quality Certification (Certification) pursuant to Section 401 {40 C.F.R. §121}. The U.S. Army Corps of Engineers requires state Certification before a Section 404 permit can be issued.

Subject to the attached conditions, incorporated by reference herein, the DNR has determined that a discharge from the proposed project will comply with water quality requirements of the state of Iowa {567 IAC 61}.

Prepared By/Date Executed:
Brandon Harland, section401wqc@dnr.iowa.gov; 515-954-9559; Iowa DNR, 502 East 9 [™] Street, Des Moines
IA 50319

CONDITIONS

- (1) During construction and upon completion of the project, actions must be taken to prevent pollution affecting public health, fish, shellfish, wildlife, and recreation due to turbidity, pH, nutrients, suspended solids, floating debris, visible oil and grease, or other pollutants entering a water of the state. This condition will ensure permittees comply with lowa's narrative water quality standards found at 567 IAC 61.3(2);
- (2) Equipment used in waters of the state shall be cleaned of all hazardous materials, pesticides, fuels, lubricants, oils, hydraulic fluids, or other construction-related, potentially hazardous substances before arriving on site. Wash water shall not be discharged into a water of the state. This condition will ensure permittees comply with lowa's narrative water quality standards found at 567 IAC 61.3(2);
- (3) All cleared vegetative material shall be properly managed in such a manner that it cannot enter a water of the state and cause a violation of water quality standards. This condition will ensure permittees comply with lowa's narrative water quality standards found at 567 IAC 61.3(2);
- (4) All construction debris shall be properly managed in such a manner that it cannot enter a water of the state. This condition will ensure permittees comply with lowa's narrative water quality standards found at 567 IAC 61.3(2);
- (5) Erosion shall be managed so that sediment is not discharged to a water of the state in a manner that causes a violation of water quality standards. This condition will ensure permittees comply with lowa's narrative water quality standards found at 567 IAC 61.3(2);
- (6) Riprap and temporary crossings shall consist of clean material free of coatings of potentially hazardous substances. No asphalt or petroleum-based material shall be used as or included in riprap material placed in any water of the state or within the high-water table. This condition will ensure permittees comply with Iowa's narrative water quality standards found at 567 IAC 61.3(2); and
- (7) Stockpiled dredged materials on the shore shall be managed so that sediment is not discharged to a water of the state in a manner that causes a violation of water quality standards. This condition will ensure permittees comply with lowa's narrative water quality standards found at 567 IAC 61.3(2).
