- Proof of financial liability coverage
- Required safety equipment
  - Headlights
  - Taillights
  - Working brakes
  - Turn signals
  - Horn
  - Mirrors
  - Seatbelts, if equipped

### FAQs

**Q1.** Where will OHVs be allowed to operate in state parks?

**A1.** OHVs will be allowed to operate on any state park, state recreation area, or state forest road where a motor vehicle is authorized to operate including designated parking lots. Jurisdiction over the roadway determines its use. Operation is not authorized off-road or on roads/access lanes and trails where the public is not authorized to operate motor vehicles.

**Q2.** If a registered camper wants to park an OHV on their campsite, will it be considered one of the two vehicles allowed on the campsite?

**A2.** Yes. All additional vehicles must be parked in the extra vehicle parking lot if available.

**Q3.** Can an OHV be considered a camping unit on a registered campsite?

**A3.** Yes. All campsite/campground rules and restrictions apply.

**Q4.** Will a registered camper be allowed to park an OHV trailer on their registered campsite?

**A4.** Toy hauler campers are considered a camping unit. Storage of all other OHV trailers will be subject to space and storage available on a park-to-park basis (treated similar to boat trailers).

**Q5.** How do I know what safety equipment is required?

**A5.** Off-highway vehicles are treated as motor vehicles under this use.

**Q6.** Is there anything changing with the Other Power-Driven Mobility Device (OPDMD) Program?

**A6.** No, people with mobility impairments/disabilities may still continue to apply for modified access through the OPDMD Program.
