

Atlantic

The Atlantic monitoring site was located in Cass County, Iowa. Monitoring for ammonia began on April 15, 2003 and for hydrogen sulfide on April 24, 2003. Monitoring for both gases ended on September 23, 2003. This monitoring site was located near the Dairy Cattle operation owned by Milk Unlimited, which was permitted for 4,320,000 pounds of livestock. The monitors were located in ambient air, on property associated with a residence, and within 100 meters of a house. In late 2003 the property associated with the residence was purchased by Milk Unlimited, which ended the department's ability to monitor at the site. Also, since the house was owned by the owner of the CAFO, it was no longer a separated location. Atlantic has an AQS identification number of 19-029-0003.
