

Household Hazardous Materials

Make our chores and projects easier, but they:

- Are not regular trash
- May contaminate land and water resources

What can we do?

- Never place in the trash, pour down the drain, into storm sewers or waterways.
- Read product label for use, storage and disposal recommendations
- Dispose of unwanted materials at your **Regional Collection Center**

Contact your local **Solid Waste Agency** or **Regional Collection Center** to learn more about HHMs or go to www.iowadnr.gov/hhm
Consumer Education Brochures available upon request.

**Bring It In,
We All Win.**
