

## Iowa DNR/Household Hazardous Materials

**Material:** Arsenic

**Potential Hazards:** Arsenic is an element that occurs in several forms. All arsenic- containing substances are toxic to varying degrees. Arsenic may appear in older types of insecticides.

**Recycle / Reuse:** N/A. Take this material to your local Regional Collection Center.

**Proper Disposal:** Take any products that contain arsenic to your local Regional Collection Center for disposal, find yours at [iowadnr.gov/hhm](http://iowadnr.gov/hhm) under the RCC tab.

**Green Alternatives:** Physical, cultural or biological controls may work as alternatives to pesticides, depending on the insect, type of plant and your geographic location. Check with your local State Extension or County Conservation Offices for guidance.
