7.				undwater Professional or in the field of Earth Sciences. of professional experience are required.

08/2025 cmc DNR Form 542-0093

The person must be able to show the professional application of scientific or engineering judgment, initiative, and application of scientific or engineering principles to execute work as a Groundwater Professional. This does not include performance of routine technical activities only, such as, drilling wells, water level measurements, laboratory work, sampling, soil excavation, drawing contour level measurements and maps, or compilation of data into a table. The applicant's experience must include using the results of such routine technical work in determining underlying geology and hydrogeology, movement of groundwater, composition of groundwater, the presence and movement of any contamination, any future impact of contamination, and the design of remediation systems. (Submission of detailed resume required.)

COURSE AND EXAMINATION:

The applicant must first show qualification with the above criteria by completing and submitting this application. Upon approval of the application, the applicant must complete the 16-hour risk-based corrective action (RBCA) course of instruction, or approved self-study course, and pass the certification examination (except as provided in Lowa Administrative Code 567-134.3(6)). 12 hours of approved continuing education must be received during each 2-year period after initial certification, along with a renewal application and \$200 renewal fee.

APPLICATION FEE:

A non-refundable, \$200 certification fee must accompany each application. To pay via credit card, please email your completed renewal application, with required supporting documentation to ustlicensing@dnr.iowa.gov, and request to pay with card. To pay via check, please send the completed application, required supporting documentation and fee to:
