<sup>\*</sup> This is the LC50 for the most sensitive warm-water fish or plankton. Attach additional sheets if necessary.

## 6. Effluent Characteristics

Complete Part 6 for <u>each</u> process wastewater outfall.

## Part A.

All applicants must provide estimates or data for every pollutant in Part A. Use the codes in the table at the bottom of the page to describe the source of your estimate.

	Concentration			Mass			
Pollutant	Average	Maximum	Units	Average	Maximum	Units	Source of Estimate (Code)
a. Biochemical Oxygen Demand (BOD)							
b. Chemical Oxygen Demand (COD)							
c. Total Organic Carbon (TOC)							
d. Total Suspended Solids (TSS)							
e. Ammonia (as N)							

Parameter	Maximum Daily Value	Average Daily Value	Minimum Daily Value	Source of Estimate (Code)	Units
f. Flow					million gallons per day
g. Temperature (October - March)					degrees Fahrenheit
h. Temperature (April – September)					degrees Fahrenheit
i. pH					Standard Units

## **Codes for Source of Estimate**

Source of Estimate	Code	Source of Estimate	Code
Engineering study	1	Data from other similar plant(s)	4
Actual data from pilot plant(s)	2	Best professional estimates	5
Estimates from other engineering studies	3	Other	Specify on form

PRIC	
Outfall Number:	

## Part B.

Refer to Table 2 of the instructions. If you know or have reason to believe any of the pollutants in Table 2 will be present, or if any of the pollutants are limited by an effluent limitation guideline or new source performance standard, list the pollutant, estimated values, and source of information in the table. Attach additional copies of this sheet if needed. Use the codes in the table in Part A to describe the source of your estimate.

Ball to a		Concentration			Mass	6	
Pollutant	Average	Maximum	Units	Average	Maximum	Units	Source of Estimate (Code)

PRIC	
Outfall Number:	

## Part C.

Refer to Table 3 of the Instructions. If you believe any of the pollutants in Table 3 will be present in the discharge, list them below. Attach additional copies of this sheet if needed. Use the codes in the table in Part A to describe the source of your estimate.

Dallistant		Quantitative Estimate (if available)								
Pollutant	Concentration	Conc. Units	Mass	Mass Units	Source of Estimate (Code)					

## FORM 4 INSTRUCTIONS DO NOT SUBMIT – FOR APPLICANT USE ONLY

#### 1. Sources of Pollution

- List all sources of wastewater discharged through each outfall.
- Operations may be described in general terms (for example, "dye-making reactor" or "distillation tower").
- You may estimate the flow contributed by each source if no data are available.

#### 2. Production

- A. Industries with effluent guidelines are shown in Table 1 of these instructions. A guideline applies to your facility if your industry is listed in the table and you have process wastewater.
- B. An effluent guideline is expressed in terms of production if the limitation is expressed as mass of pollutant per operational parameter. For example, "pounds BOD per cubic foot of logs from which bark is removed." Industries with production-based limits are indicated in Table 1.
- C. Complete this item only if you checked "yes" for Item 2.B. Report quantities in the units of measurement used in the applicable effluent guideline. Production figures must be based on actual daily production and not on design capacity or future operation. More information on ELGs can be found at <a href="https://www.epa.gov/eg/industrial-effluent-guidelines">https://www.epa.gov/eg/industrial-effluent-guidelines</a>.

## 3. Treatment System

- For each outfall, briefly describe any planned treatment of wastewaters prior to discharge or provide a reference to a previously submitted engineering report.
- Describe the ultimate disposal of any solid or liquid wastes not discharged.

#### 4. Other Facilities

- Report the name and location of any existing plant(s) which (to the best of your knowledge) resembles your
  planned operation with respect to items produced, production process, wastewater constituents, or wastewater
  treatment.
- No studies need to be conducted to respond to this item. Only data which are already available need be submitted.

#### 5. Chemical Additives

- If you add any chemicals, complete the table.
- Additives may include boiler water treatments, cooling tower treatments, water treatment products, etc.
- Values for LC<sub>50</sub> can usually be found in the "Ecological Information" section of an SDS.
- You must include a copy of the safety data sheet (SDS).

#### 6. Effluent Characteristics

- You must complete Parts A C for each outfall that discharges processes wastewater. For outfalls that discharge non-processes wastewater, complete Form 2. For outfalls that discharge stormwater, complete Form 2F.
- Each part of this item requires you to provide an estimated maximum daily and average daily value for each pollutant or parameter listed. The source of each estimate is also required.
- For Parts A through C, base your determination of whether a pollutant will be present in your discharge on your knowledge of the proposed facility's raw materials, maintenance chemicals, intermediate and final products, byproducts, and any analyses of your effluent or of any similar effluent. You may also provide the determination and the estimates based on available in-house or contractor's engineering reports or any other studies performed on the proposed facility (see Item 4 of the form). If you expect a pollutant to be present solely as a result of its presence in your intake water, please state this information on the form.
- All estimated pollutant or parameter levels must be reported as concentration and total mass, except for discharge flow, temperature, and pH. Total mass is the total weight of pollutants or parameters discharged over a day.

#### Form 4 Instructions - DO NOT SUBMIT

- <u>Mass Calculation:</u> The formula for mass of a pollutant discharged is: Concentration \* Flow \* 8.34 = Mass. (Concentration in mg/L, flow in MGD, mass in lb/day)
- When providing the estimates, use the codes in the following table to indicate the source of such information in the "Source of Estimate (Code)" column in 6.A, 6.B, and 6.C.

Source of Estimate	Code	Source of Estimate	Code
Engineering study	1	Data from other similar plant(s)	4
Actual data from pilot plant(s)	2	Best professional estimates	5
Estimates from other engineering studies	3	Other	Specify on form

#### 6.A.

• All applicants must provide estimates for all pollutants in this table.

#### 6.B.

- Review Table 2 of the instructions for a list of pollutants.
- List every pollutant from Table 2 that you expect to be in your effluent.
- Provide concentration and mass estimates for each pollutant you list, along with the source of the estimate.
- You must report estimates for all pollutants that are limited by an effluent limitation guideline or new source performance standard. For more information on ELGs, see http://water.epa.gov/scitech/wastetech/guide/industry.cfm.
- You must report that 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) may be discharged if you know or have reason to believe that TCCD may be present, or if you will use or manufacture any of the following compounds:
  - 2,4,5-trichlorophenoxy acetic acid (2,4,5-T) (CAS # 93-765);
  - 2-(2,4,5-trichlorophenoxy) propanoic acid (Silvex, 2,4,5TP) (CAS # 93-72-1);
  - 2-(2,4,5-trichlorophenoxy) ethyl 2,2-dichloropropionate (Erbon) (CAS # 136-25-4);
  - 0,0-dimethyl 0-(2,4,5-trichlorophenyl) phosphorothioate (Ronnell) (CAS # 299-84-3);
  - o 2,4,5-trichlorophenol (TCP) (CAS #95-95-5;
  - Hexachlorophene (HCP) (CAS # 70-30-4).

## 6.C.

- List any pollutants in Table 3 of these instructions that you believe will be present in any outfalls Attach a separate page briefly explaining why you believe they will be present.
- Provide estimates based on any existing quantitative data.
- Estimates of pollutant quantities are not required if data do not exist.

## TABLE 1: EFFLUENT LIMITATION GUIDELINES INDUSTRIES AND REQUIRED TESTING

(All industries in this table are subject to an effluent limitation guideline)

40 CFR Part Number	Industry Category	Production Based Guideline
456	Adhesives and sealants	
467	Aluminum forming	Yes
444	Auto and other laundries	
461	Battery manufacturing	Yes
465	Coil coating	
468	Copper forming	
469	Electrical and electronic components	
413	Electroplating	
457	Explosives manufacturing	
433	Metal finishing	
464	Metal molding and casting	Yes
454	Gum and wood chemical manufacturing (Except subparts D and F)	
	Subpart D - tall oil rosin	
	Subpart F - rosin-based derivatives	
415	Inorganic chemicals manufacturing	
420	Iron and steel manufacturing	Yes
425	Leather tanning and finishing	Yes
471	Nonferrous metals forming	
440	Ore mining and dressing	
414	Organic chemicals, plastics and synthetic fibers	
447	Paint formulating	
446	Ink formulating	
455	Pesticide chemicals	Yes
419	Petroleum refining	
439	Pharmaceutical preparations	
459	Photographic equipment and supplies	
463	Plastics molding and forming	
448	Printing and publishing	
430	Pulp, paper and paperboard	
428	Rubber processing	
417	Soap and detergent manufacturing	
423	Steam electric power plants	Yes
410	Textile mills (except Subpart C)	
429	Timber products processing	

## **TABLE 2: POLLUTANT LIST FOR PART B**

Volatiles			
Acrolein	Acrylonitrile	Benzene	Bromoform
Carbon tetrachloride	Chlorobenzene	Chlorodibromomethane	Chloroethane
2-cloroethylvinyl ether	Chloroform	Dichlorobromomethane	1,1-dichloroethane
1,2-dichloroethane	1,1-dichloroethylene	1,2-dichloropropane	1,3-dichloropropylene
Ethylbenzene	Methyl bromide	Methyl chloride	Methylene chloride
1,1,2,2-tetrachloroethane	Tetrachloroethylene	Toluene	1,2-trans-dichloroethylene
1,1,1-trichloroethane	1,1,2-trichloroethane	Trichloroethylene	Vinyl chloride
Base/Neutral			
Acenaphthene	bis(2-ethylhexyl)phthalate	Dimethyl phthalate	Hexachloroethane
Acenaphthylene	4-bromophenyl phenyl ether	di-n-butyl phthalate	Indeno(1,2,3-cd)pyrene
Anthracene	Butylbenzyl phthalate	2,4-dinitrotoluene	Isophorone
Benzidine	2-chloronaphthalene	2,6-dinitrotoluene	Naphthalene
Benzo(a)anthracene	4-chlorophenyl phenyl ether	di-n-octyl phthalate	Nitrobenzene
benzo(a)antinacene	4-chlorophenyi phenyi ether	1,2-diphenylhydrazine (as	Nitroberizerie
Benzo(a)pyrene	Chrysene	asobenzene)	N-nitrosodimethylamine
3,4-benzofluoranthene	Dibenzo(a,h)anthracene	fluoroanthene	N-nitrosodi-n-propylamine
Benzo(ghi)perylene	1,2-dichlorobenzene	fluorene	N-nitrosodiphenylamine
Benzo(k)fluoranthene	1,3-dichlorobenzene	hexachlorobenzene	Phenanthrene
bis(2-chloroethoxy)methane	1,4-dichlorobenzene	hexachlorobutadiene	Pyrene
bis(2-chloroethyl)ether	3,3'-dichlorobenzidine	hexachlorocyclopentadiene	1,2,4-trichlorobenzene
bis(2-chloroisopropyl)ether	Diethyl phthalate		
Metals, Cyanide, and Total Phenols			
Antimony, total	Chromium, total	Nickel, total	Zinc, total
