

EMS In Depth: "Auditing Your Environmental Management System"

Featured Speaker: Jessica Nicholson, Environmental Engineer, Burns & McDonnell

Wednesday, April 2nd, 2025

9:00am - 11:00am

Agenda

- Brief Review of Webinar 1: Environmental Aspects and Impacts, Defining Significance
- Brief Review of Webinar 2: Establishing Environmental Objectives
- Audit Basics
- Types of Audits
- How-To Auditing
 - Steps of an audit
 - Tips & techniques
 - Examples
- Summary

Auditing - both internal and external - is such a critical part of a facility's EMS. During this online training we will focus on how to audit your ISO 14001 EMS and the different hurdles you may run into.

- What is the purpose of an audit?
- What are the kinds of audits that can be performed?
- How do we make sure we are auditing properly?
- What actions can we implement after the audit?

The webinar will be approximately two hours in length will include a combination of lecture, real-world examples, and resources to facilitate discussion.
