Re: Variance Approval
Phase II & Phase III Improvements
Marshalltown, Iowa
C190746 04

Dear Mr. Fields

The Iowa Department of Natural Resources in accordance with Subrule 567-64.2(9)c of the Iowa Administrative Code has approved your consultants request for a variance from Iowa Wastewater Facilities Design Standard 17.3.4.3.b which requires aeration of sludge holding tanks. Based on the information presented, the purpose and intent of the rule can be met with appropriate sludge handling practices. However, should major problems develop the city will be required to meet the design standard.

Sincerely,

Darrell McAlister, Chief
Surface and Groundwater Protection Bureau
Environmental Protection Division
