

Iowa Monitoring Locations and Design Values for Nitrogen Dioxide 2022-2024

A design value is a tool that can be used to understand pollution levels at a specific location. A design value may be set for any pollutant. The U.S. EPA's official definition is explained this way: "a design value is the mathematically determined pollutant concentration at a particular site that must be reduced to, or maintained at or below the National Ambient Air Quality Standard to assume attainment." The design value number tells us how a particular site or area compares with the National Ambient Air Quality Standards (NAAQS).

Iowa nitrogen dioxide (NO₂) monitor location and information is detailed on the following pages. The EPA design value for 1-hour NO₂ is equal to the average of the 98th percentile 1-hour value for the most recent three years. EPA revised the NO₂ NAAQS in April of 2012. A monitoring site must have a design value less than 100 parts per billion to be considered "in attainment" with the NO₂ NAAQS. All monitoring sites in Iowa are in attainment with the 1-hour NO₂ NAAQS. Additional information on the revised NO₂ standard is available here: <https://www.epa.gov/no2-pollution>

Iowa Nitrogen Dioxide Monitors (2024)

AQS Site ID	Site Name	Location	County	Design Value?
19-163-0015	Jefferson School	Davenport	Polk	No
19-177-0006	Lake Sugema	Keosauqua	Van Buren	Yes

A site must be operational for at least three years to compute a design value and meet additional completeness requirements specified in [40 CFR 50 Appendix S](#).

The Jefferson School site was converted from NO_y monitoring to NO₂ monitoring in January of 2024, There is not enough data available to determine a design value.

Iowa NO₂ Monitoring Network 2024

Iowa NO₂ Design Values: 2022-2024

Concentrations listed in ppb. Values greater than 100 exceed the standard.

Iowa NO₂ Design Values: 2022-2024

Iowa NO2 Design Values 2024				
County	City	EPA Site Id	Design Value 3-year Average of 98th Percentile (ppb)	Years Averaged
Scott	Davenport	191630015	n/a	n/a
Van Buren	Not in a City	191770006	7	2022-2024
(Three Year Averages Greater Than 100 ppb Indicate Non-Attainment with the 1-hour NAAQS)				

Iowa NO₂ Design Values Chart: 2022-2024
