

Appendix 16. Iowa Threatened and Endangered Animal Species

Due to independent timeframes for updates to Federal Threatened and Endangered (T&E) Status, State T&E Status, and SGCN Status, the statuses for a given species at a given point in time may not always appear to be in accord. Iowa Administrative Code 571 - Chapter 77 lists State Endangered and Threatened Species. The SGCN scoring criteria are intended to provide a conservation status index; additional information and recommendations from taxonomic experts may be included in T&E listing decisions on a case by case basis.

Appendix Table 16-1. State and Federally Listed Animal Species

Species common and scientific names as well as species concept is presented here as presented within Iowa code. However, the final rule may be updated to reflect the currently accepted scientific and common names. Additions to the 'Common Name' and 'Scientific Name' columns (in parentheses) are added by the Plan authors for clarification. The 3rd column presents the current State T&E list as of the time of this plan submission. A proposed update to the State of Iowa T&E species is in process in the fall of 2025, anticipated to be finalized in 2026. The proposed Iowa T&E species are also presented below in the 4th column. The 5th column displays federal listing status as of 2025.

T = Threatened, E = Endangered, SC = Special Concern (Iowa only), C = Candidate (federal only), P = Proposed

Common Name	Scientific Name	IA T/E/SC Current	IA T/E Proposed	Fed T/E/C
Amphibians				
Blue-spotted Salamander	<i>Ambystoma laterale</i>	E	E	
Mudpuppy	<i>Necturus maculosus</i>	T	T	
Eastern Newt	<i>Notophthalmus viridescens</i>	T	T	
Crawfish Frog	<i>Lithobates (Rana) areolata</i>	E

Dragonflies and Damselflies				
Prairie Bluet	<i>Coenagrion angulatum</i>		E	
Taiga Bluet	<i>Coenagrion resolutum</i>		T	
Sioux Snaketail	<i>Ophiogomphus smithi</i>		T	
Westfall's Snaketail	<i>Ophiogomphus westfalli</i>		T	
Plains Emerald	<i>Somatochlora ensigera</i>		T	

* Eastern Black Rail - Only the subspecies *Lateralus jamaicensis jamaicensis* is listed as federally threatened; this subspecies is considered an accidental species in Iowa by the Fish & Wildlife Service.

** Whooping Cranes which are occasionally observed in Iowa are part of a Non-essential, Experimental Population. See this link for a definition: <https://ipac.ecosphere.fws.gov/status/list#EXPN>

*** Rufa Red Knot - only the subspecies *Calidris canutus rufa* is listed as federally threatened; this subspecies does not occur in Iowa.

† Frigid Ambersnail is no longer considered a valid, extant species; known as a pleistocene fossil only.

†† The current list includes both the Leonard's Skipper and Pawnee Skipper as subspecies.

††† Dakota Skipper and Poweshiek Skipperling are now considered extirpated from Iowa, but appear on this list because, at the time of the last update to the Iowa T&E species list, they were not.

Appendix Table 16-2. State and Federally Listed Plant Species

Species common and scientific names as well as species concept is presented here as presented within Iowa code. Additions to the 'Common Name' and 'Scientific Name' columns (in parentheses) are added by the Plan authors for clarification. The 3rd column presents the current State T&E list as of the time of this plan submission. A proposed update to the State of Iowa T&E species is in process in the fall of 2025, anticipated to be finalized in 2026. The proposed Iowa T&E species are also presented below in the 4th column. The 5th column displays federal listing status as of 2025.

T = Threatened, E = Endangered, SC = Special Concern (Iowa only)

Common Name	Scientific Name	IA T/E/SC Current	IA T/E/SC Proposed	Fed T/E/C
Balsam fir	<i>Abies balsamea</i>	SC	SC
