“Upgrading your Environmental Management System – Navigating the ISO 14001:2026 Update”

As part of the *EMS In Depth* webinar series

Featured Speakers: Jess Nicholson, Environmental Engineer, Burns & McDonnell

Date: Thursday, August 13th

Time: 9:00 – 11:00 am CST

Is your organization ready for the transition to the new ISO 14001:2026 standard? Join us for an important 2-hour webinar, *“Upgrading your Environmental Management System - Navigating the 14001:2026 Update,”* designed specifically for EHS industrial professionals tasked with maintaining their facilities’ environmental management systems. This session will provide a comprehensive breakdown of the critical differences between the 2015 and 2026 standards, clearly outlining the new requirements and timelines necessary to keep your facility on track with interpreting and adopting the updates. Whether your facility is already certified or you are managing a robust but unregistered system, you will gain actionable insights into successfully bridging the gap between current practices and updating to new requirements to ensure your systems remain audit-ready.

The webinar presentation will be delivered by an EMS consultant team from Burns & McDonnell that is highly experienced with EMS auditing as well as the new 2026 requirements. Content will focus on identifying the key changes reflected in the new 2026 standard, a gap analysis workshop, and practical transition strategies that emphasize risk prioritization and workload management for smaller teams. You will leave with actionable tools to help you manage the update process without disrupting your daily operations.

The webinar will be approximately two hours in length and will include a combination of lecture, examples, and resources to facilitate discussion and encourage you to gain a practical understanding of the following material:

- ▶ ISO 14001 Evolution
- ▶ Key Changes and Practical Examples
- ▶ Upgrading an Existing EMS
- ▶ Workshop: Gap Analysis

Secure your spot today to demystify the new standard and walk away with a clear roadmap for aligning your ISO 14001 environmental management system with the new 2026 update!
