**Describe the adopted area** – *please include accesses/landmark information, cleanup/adoption goals, estimated size of cleanup group, equipment volunteers may need, equipment available for volunteers, and any other information regarding your adoption and cleanup effort.*

Winnebago River Water Trail, Dahle Park near Lake Mills to Pammel Park in Forest City. We have about 8 regular volunteers and have had as many as 14 join in river cleanups. We did our first one in August of 2009 and have done two clean ups this year. We have two canoes, owned by the city of Forest City, and most members have one or more canoes. We will be planing another cleanup in May and the date will be determined later and is determined by the water level. Too high and we don't go.
